Proposed Purchase of New Grader Creates Bit of Stir at Session of City Fathers

Preference for Canadian-Made Goods, And Through Local Agents Rather Than "Peripatetic" Agents of American Companies Is Argument Advanced—Graders of Two Firms Being Tried Out

Thursday evening's meeting of the City Council was a calm routine session except for a rather stiff breeze from Alderman Howatt's end of the table at the very conclusion of the evening. Alderman Scott had reported that a Russell grader was on the ground, unloaded and ready for business, that the machine had been shipped to the city freight collect, but as yet the city had not paid this freight. Alderman Howatt wanted to know why the machine had been unloaded if the charges were not paid by the shipper, and why there were any charges in the face of the agent's promise to have a grader sent to the city for approval without any expense. It looked to him as though the city had bought the machine without giving any firm bid to the manufacturers of the Russell grader an opportunity to present their case. He said that he had looked into the merit of the Sawyer-Massey grader and was convinced that it was quite as good as the Russell and for two reasons he was in favor of having the city purchase this grader rather than the Russell, an American made product, which appeared to have unusual merit in the eyes of City Engineer Watson. First, he believed in Canadians buying Canadian made articles; and second, he thought the city should patronize local agents rather than peripatetic agents of American companies. Alderman Inglis gave vigorous support to the arguments of Alderman Howatt, and stated that as far as he was concerned, from knowledge of the two graders, he was ready without further ado to support the award of the order of the city's grader to the Canadian company. Some doubt was expressed by Alderman Howatt as to whether for the present the city could not get on without a new grader, but the discussion finally ended by the council agreeing to request the Sawyer-Massey people to send their grader on approval without any expense to the city.

With Mayor Montgomery presiding and Aldermen Gonthard, Inglis, Howatt, Gibson and Scott in their places, and a number of the council evidently feeling weary after three nights at the carnival, business of a routine nature was done without waste of much energy or talk. Correspondence was read and dealt with. \$60 was received from the City Solicitor and accepted in full settlement of the Pearson judgment. \$40 was received on the account of the Calgary Sanitarium in connection with patient Griffiths, and the amount was ordered to be sent on to the Sanitarium. James Smart, who wanted to try more land from the city, was requested to get former purchase into better standing before taking on further responsibilities. A communication from Curt Smith reporting damage of \$150 to carpets, furniture and wall through a city sewer flushing back into the basement of the Driad hotel was sent on to the City Engineer for his attention.

Permission was given to J. S. Poole to erect a gasoline pump on McDonald street, permission dating from possession of the premises. Similar permission was granted to B. Nowell for a tank further north on McDonald street. A. L. Yates was given permission to build a garage on Lansdowne street, value \$50.

The agreement between the city and the Hospital Board was received from the City Solicitor and was approved and instructions were given that it be forwarded to the Department of Public Health for approval. In connection with the report of the delegates to the recent Municipalities Convention in Edmonton, City Clerk Fraser pointed out that while a prophet might not be accepted in his own country, certainly the efforts of the Wetaskiwin apostles of public ownership of public utilities had not been wasted, for public ownership has become one of the issues in the American Presidential election since the report of the delegates in favor of the principle.

Alderman Howatt, who is acting mayor during July, August and September. The date of the Court of Revision was fixed for August 7 at 8 p.m. The reception of the report of Alderman Scott at this point precipitated the discussion begun by Alderman Howatt, who was supported by Alderman Inglis. The City Clerk was instructed to inform the local agent, George Long who was present at the meeting, that the city would give the Sawyer-Massey Co. grader the once-over at the same time the Russell grader, already here, was given a try-out.

Following settling of this matter, the meeting adjourned.

The following report was given to the last meeting of the City Council by the Wetaskiwin delegates to the Convention of the Union of Alberta Municipalities:

Mayor Montgomery and J. E. Fraser, City Clerk, represented the city at the 24th annual Convention of the Union of Alberta Municipalities, which was held in Edmonton on June 26th, 21st and 22nd. This is the first time the Convention was held in the summer, and the large attendance indicated that the change in this respect was an improvement.

Dr. Rutherford, Chancellor of the University of Alberta, Premier Brownlee, Hon. George Hoadley, Minister of Agriculture and Health, Hon. Perrin Baker, Minister of Education, Mr. J. J. Smith, Deputy Minister of Municipal Affairs, Saskatchewan, W. B. Spence, Deputy Minister of Municipal Affairs, Alberta, Mr. S. Baker, City Clerk, London, Ont., and Secretary of

the Union of Canadian Municipalities, John Blue, Secretary of Board of Trade, Edmonton, E. A. Pinchbeck, Secretary-Treasurer, Alberta Association of Municipal Districts, Dr. Jenkins, Medical Inspector of Health, Frank Barnhouse, Vice-President of Alberta Motor Association, and others addressed the Convention. Premier Brownlee gave a most instructive address on "Town and Rural Planning and Beautification." The Government will shortly engage an expert for this work, who will advise and assist Municipalities in this new and important branch of Municipal endeavor. It is the intention of the Government to set aside small areas as rural parks along the main highways and make them real beauty spots for the benefit of the local residents and tourists, and he urged that cities, towns and villages secure impetus for parks and playgrounds.

(Continued on Page 4)

FIFTEEN ENTRIES IN FIELD CROPS COMPETITION

The keenest interest has been manifested in the Field Crops Competition being conducted in this community by the Board of Trade. The entries closed on Tuesday evening, and at that time Harold Inglis, the secretary, had received no less than fifteen entries. The fields entered are in all directions from Wetaskiwin, which is evidence that there is a good crop in the making in the entire district. The entries include both wheat and oats. The awards will be made by judges supplied by the Field Crops Bureau of the Provincial Department of Agriculture.

Town Topics

Mrs. C. D. Enman intends leaving in a few days for a trip to Vancouver and Victoria.

Master Robert Edwards left to spend the holiday season with friends in Vermilion.

Misses Hemme and Hiller Ecklund of Lone Ridge, left Wednesday morning for a six weeks' holiday at the coast.

The Wetaskiwin district has had abundance of rain during the past few weeks, and the crop outlook is very promising.

Mr. and Mrs. A. Coburn are spending a couple of weeks' holiday at Banff and other places in the southern part of the province.

Gordon Provo, Tuesday for Westlock, where he will be employed in Christopher's Grocery store. Mr. Christopher will leave in a few days.

A. S. McKay of Summerside, P.E.I., was a visitor at the home of Mr. and Mrs. Frank Montgomery during the week. He was en route for California.

W. J. Pickard went to the Calgary Exhibition last week with a number of his prize winning Jerseys and purchased attending the other fair in a circuit. He is accompanied by Dan Enman.

Gordon C. French, who has been assistant principal of the Westlock consolidated school, spent the weekend at home here prior to entering upon course of studies at the summer school at the University.

B Company of Northern Alberta Battalion to the number of sixteen, who have been attending the training camp at Calgary, returned home on Tuesday. They were in charge of Major Godfrey Baker.

Messrs. Ed. and Clarke Mason attended the Stampede at Lacombe on July 2nd and competed in the roping competition, when the former again demonstrated that he was one of the best ropers in the west by carrying off first prize.

Mr. and Mrs. Andrew Jensen returned home from their trip to Vancouver, Victoria and San Francisco a few days ago, and report having spent a delightful holiday. They spent some time with their daughter, Mr. A. E. Maggs, at Victoria.

Mr. A. Hendrickson left for Mission, B.C., on Monday morning, accompanied by his two daughters, Mrs. P. Hendrickson and Mrs. O. Hendrickson, who are in Mission, where Mr. Hendrickson intends visiting for a year. If the climate agrees with him, he intends making his home there.

MOOSE JAW, July 5.—Rapid progress in the work of the Saskatchewan Livestock Co-Operative Marketing Association was revealed in reports presented at the annual meeting which opened here yesterday.

In March of the present year, the membership totalled only 3,407. Today the membership total is 10,316. The organization has 99 local shipping associations organized, of which 76 are now operating, and in the last 12 months has handled more than 1,160 cars of livestock.

Sales offices are maintained at Moose Jaw and Prince Albert.

Today, for the first time since his accident on the Calgary trail just south of Wetaskiwin, Nick Ostyryznuk, manager of the Dominion Colonization company, has been able to get to his office. Mr. Ostyryznuk is still carrying his arm in a sling, and will be some months before he fully recovers the use of the member.

Junior athletes, boys and girls between the ages of 14 and 18, are asked to turn out to the initial workout at the Exhibition Grounds tomorrow (Friday) evening at 6:30, preparatory to the Junior track and field Championships of Alberta to be held here on August 15. The jumping pit has been prepared inside the oval. Members of the committee will be on hand to put the young folks through their paces. A large turnout is hoped for, when arrangements will be made for a definite training program.

The first entry was received last Thursday from far-away Medicine

Hat. Bernice McIntosh, 16-year-old girl wonder athlete, will make the trip of about four hundred miles. She holds a couple of provincial records. Owing to the absence of H. B. Tanner from the city, Frank Aboussy has consented to act as chairman of the Championships Committee. B. W. Bellamy is secretary and the other members are Messrs. Chalmers, Beavo, McMurdo and Dr. N. A. Johnson.

The town of Killam is going to be represented by a real dark horse in the mile and five mile runs. Entry forms were applied for on Monday.

Obituary

MRS. DANIELSON

Another of the early settlers of the Haultain district passed away in the person of Mrs. Amanda Charlotte Danielson, passed away on the 22nd ult., at the age of seventy-six years and eleven months. She was born in Sweden, but had resided in the United States for some time prior to coming to the Haultain district. She leaves to mourn her loss a husband and two sons, namely, Edwin at home and Charles at York, B.C., and two sisters, Mrs. Effert of Wetaskiwin, and Mrs. Effen of Metiskow, besides a very large circle of friends and acquaintances. The funeral, which was conducted by Rev. J. A. Wijnch, took place on Monday at the Nashville cemetery, and was largely attended, friends coming from far and near to pay their last tribute of respect to the departed.

HUGH McGRANDLE

Another of the early settlers of the Wetaskiwin district passed away at the morning of last week in the person of Hugh McGrandle, at the age of seventy-one years, three months and twenty-two days. He was born in Quebec and came to the Wetaskiwin district twenty-eight years ago and took up a homestead just east of the city. He was a land surveyor by profession, and was employed for a number of years by the government work in the Peace River district. He was very widely known and held in the highest esteem. A service was held at Moore's Undertaking rooms and the remains were shipped to Hantelville, Ont., for interment in the family plot. He is survived by two sons and one daughter, namely, William at Ottawa; Hugh G. of the Wetaskiwin district, and Mrs. Hogg of Beaver Lodge. The remains were accompanied east by his son Hugh.

MRS. W. J. GOULD

Word was received a few days ago of the death in Vancouver on Tuesday, July 3rd, after a lingering illness, of Mrs. Gould, wife of J. W. (Wes.) Gould, a former resident of this city. Mr. and Mrs. Gould came to Wetaskiwin twenty-four years ago from Summerside, Prince Edward Island, and made this their home until ten years ago when they moved to Vancouver, where they have since resided.

While motoring to Edmonton early Thursday morning last, Ed. Mason saw a mouse just as he was approaching Lucas Grove. The animal seemed tame and he drove quite close to it, before it jumped over the fence and proceeded in a westerly direction.

Mrs. E. D. O'Neil, Mrs. Frank Chiddy and Mrs. J. E. Burkholder attended the Royal Purple convention held at Kamloops last week as delegates from Wetaskiwin. Mrs. Burkholder had the honor of being elected Leading Lady in the Supreme Lodge.

Mr. and Mrs. Frank Ballhorne and son Marvin and Mr. and Mrs. Richard Ballhorne and son Gordon and Mr. Russell Lockwood of Calgary, returned on Tuesday from a motor trip to Golden, B.C. They report having had a delightful outing, and the roads were in very good condition all the way.

The citizens of Wetaskiwin are tendering a farewell smoker to Mr. J. J. Christopher in the Elks' Hall on Friday evening of this week. Mr. Christopher has been a prominent business man here for the past twenty years, and has always taken a keen interest in the affairs of the city. He intends leaving in a few days for Westlock, where he will open a grocery store.

A WEEK WITH THE BIBLE

Rev. A. L. Elliott will conduct a Bible school, beginning on Monday, July 16. Sessions will be held at 9 a.m., 1:30 p.m. and 8 p.m. The morning sessions will be held in Angus Ridge school, the afternoon sessions in Battle River school and the evening sessions alternately in both schools, beginning in the former.

The subject will be "The Life of Jesus of Nazareth." The text will be St. Mark's Gospel. All are welcome.

POCKET BOOK WITH \$250 IS RETURNED

New Norway, Alta., July 9.—Alex. Housman, a peddler from Edmonton, stopped off here on business and a visit to his compatriot, Richard Forth. When boarding the train to go to Kilmann, Housman discovered he had lost his pocket-book and his all. Business compelled him to proceed, so he gave his friend particulars of the lost article. The same day, Forth was able to telephone the good news that he had found the lost pocket-book with its contents of \$250 intact, lying behind a door in the men's lavatory at the station.

Town Topics

Mrs. A. L. Elliott is conducting a Junior C.G.T. camp at Pigeon Lake this week.

Mrs. Charles Robinson and children of Vermilion, are the guests of Mrs. H. Edwards, Lansdowne street.

The Boy Scouts left on Saturday for camp at Edmonton Beach, where they will join with the Edmonton Twp.

The Norwegian Ladies' Aid will meet at the home of Mrs. B. Olson four miles south of town on Friday, July 13th at 3 p.m.

Miss Walker of the staff of the Bank of Montreal is spending part of her vacation visiting relatives at Calgary, and taking in the Stampede.

The Loyal Orange Lodge of Wetaskiwin and visiting brethren, will attend church service in the First United Church on Sunday, July 15.

Mrs. F. T. Kirstein and two children left on Sunday for Victoria, where they will spend a month visiting her sister, Mrs. A. E. Maggs and other friends.

Rev. P. C. Wade (District Cub Master) and Chief of Police Kingzett (Cub Master) took the local Cubs to Gull Lake on Tuesday for a three days camp with the Ponoka Cubs.

Mr. and Mrs. Arthur Sommers, Mrs. James Braglin and family, left on Thursday morning for two weeks vacation at the coast. En route they will visit relatives at Calgary, Blairmore and Nelson, B.C.

While motoring to Edmonton early Thursday morning last, Ed. Mason saw a mouse just as he was approaching Lucas Grove. The animal seemed tame and he drove quite close to it, before it jumped over the fence and proceeded in a westerly direction.

Mrs. E. D. O'Neil, Mrs. Frank Chiddy and Mrs. J. E. Burkholder attended the Royal Purple convention held at Kamloops last week as delegates from Wetaskiwin. Mrs. Burkholder had the honor of being elected Leading Lady in the Supreme Lodge.

Mr. and Mrs. Frank Ballhorne and son Marvin and Mr. and Mrs. Richard Ballhorne and son Gordon and Mr. Russell Lockwood of Calgary, returned on Tuesday from a motor trip to Golden, B.C. They report having had a delightful outing, and the roads were in very good condition all the way.

Some Early Wheat Such as Garnet and Reward Fully Out in Shot, C.P. Reports

Crop Generally Speaking Is Two Weeks Earlier Than Last Year—Many Fields In Alberta Showing Signs of Heading Within Next Few Days—Prospects Bright In All Western Provinces

Winnipeg, Man., July 9th.—Wheat in most sections of the West ranges from eighteen to twenty inches in height on average and all is in shot blade, reports the Canadian Pacific Agricultural Department this morning, and there is a quantity showing signs of heading and some early wheat such as Garnet and Reward is fully out in shot. Rain fell in all sections of the country and in many districts there is too much, but crop situation is still favorable and farmers optimistic. Warm rain has induced rapid growth and unless there is more precipitation during the balance of July, harvest should be early, as crop is fully two weeks ahead of last year.

Should rust develop it is not likely to do the damage it did last year in Manitoba and Saskatchewan. Rye is headed out in many districts and is proving a better crop than anticipated. Summerfallowing and new breaking has been interrupted by heavy rains. Haying has started in higher lands and yield is good. Cutting of sweet clover has also commenced showing satisfactory crops. Corn was backward, until wet weather of last week of June pushed it rapidly ahead.

Seldom have prospects in Manitoba looked better than at present, despite the very heavy rains which have made crop look sickly in some districts, completely drowning it out in others. All grain is making rapid growth and fields that were patchy due to delayed germination have partly recovered, with no damage reported from hail, frost or insects. Flax is doing nicely but a bit late. Field corn will pick up with warm weather. Cattle are thriving with plenty of food, and flies have not bothered them much. Hay shows rank and heavy growth and assures an abundant supply of winter fodder.

Present needs in Saskatchewan are warm weather to dry up fields. All small stock remarks that all have made exceptional growth. Wheat is beginning to show in head, and oats and barley look promising. Summerfallowing is well advanced and considerably more acreage will be followed this year than previously. Pastures are good and there will be a heavy hay crop. Hail damage occurred in the Estevan District and in the Langdon subdivision. Wheat suffering most but it is expected that a considerable proportion of the affected grain will recover because of moisture in the soil.

Conditions in Alberta have been almost ideal. Rains following hot weather have caused remarkable growth and it is conceded this is one of the best crops on record from weather standpoint. All wheat is in shot blade and in many fields show signs of heading within next few days. Oats and barley are making correspondingly good growth. Winter wheat is in head and despite fact that some of it was touched by frost will be good crop. Rains have affected the sugar beet crop but good weather should put things right. Livestock is doing well.

Severe loss to cherry crop in British Columbia was caused by rains during past week. Sixty per cent in Penticton district is a total loss. Summerland sixty per cent. Strawberry in the Creston district are seriously affected and ten thousand crates spoiled. Picking of early berries is about over and work has commenced on later varieties. In the west end of the Okanagan some damage occurred to the apple crop by hail, which damage cannot be estimated until after thinning.

FIFTH FORTNIGHTLY CROP REPORT (Issued by Department of Agriculture, Government of Alberta, Edmonton, July 7th, 1928).

Early sown wheat is well headed out in many sections of the province and all grains are making splendid growth, according to telegraphic reports received by the Department of Agriculture on Friday for the fifth fortnightly crop report of the season. Growing conditions have been ideal since the last report was issued, the entire province having benefited from general rains during the past two weeks. Crops which appeared somewhat patchy owing to the delayed germination reflecting the drought in May, are showing a much greater uniformity, and little difficulty is anticipated at harvest time as a result of this situation.

Coarse grains have all been making vigorous growth and a great many fields of oats and barley are in the shot blade. All crops have stood much more heavily than was expected during the dry period, with a consequent improvement in the prospect for a heavy yield. A number of districts report that summerfallowing is being temporarily delayed by the unusual amount of moisture in the soil. Conditions have been ideal for breaking and in many localities more new land is being brought under cultivation this season than for many years.

Rain has interfered to some extent with haying in the southern part of the province, where a very satisfactory crop of alfalfa and sweet clover is being cut. Good progress is being made with the thinning of the sugar beet crop and a good yield is promised from the 8500 acres sown to beats this year.

Crops in the Peace River section of the province are somewhat more advanced than at this date last year, and prospects for a very satisfactory yield are reported.

Crop damage has been confined to the effects of hail over very limited areas and is negligible. Practically no injury from insect pests is reported. Pastures have made renewed growth as a result of the rains and livestock is in very satisfactory condition.

WORK ON BRANCH IS BEING RUSHED

Edmonton, July 9.—With grading operations on the C.P.R. branch line from Willingdon to Edmonton being rushed, and new camps opening up to take care of that section of the line between Fort Saskatchewan and the city, construction officials expect the track-laying crews to reach the vicinity of Bruderheim some time in August, and to be in Edmonton in time to handle the grain crop this fall.

BEE STING FATAL

Guelph, Ont., July 4.—Mrs. R. G. Sawyer, shortly after she had received a severe bee sting on the face, collapsed on the lawn of her home, yesterday, and died within a few minutes.

Editor Attends Convention of Canadian Weekly Press Men

Mr. and Mrs. V. C. French returned Monday morning from attending the convention of the Canadian Weekly Newspaper convention held at the Macdonald Hotel, Edmonton, following by a pleasure trip to Jasper, where a delightful three days was spent at Jasper Park Lodge. The convention was one of the most successful ever held, and about 250 were in attendance from all parts of Canada.

Jasper Park Lodge, a summer hotel of the Canadian National Railways, is located three miles from the station. The hotel is a beautiful structure, and in the centre of it is a two-faced stone fireplace where full-length logs are burned. The hall room where three hundred people can dance comfortably adjoins the lounge as does the dining room which has accommodation for more than four hundred people at a sitting.

Into the construction of the main building and the bungalows has been

Neighbor's Weeds

"What is the use of destroying weeds on my farm when my neighbor lets them grow, and seeds from his weeds blow over my place?"

This was one of the commonest questions which speakers sent out by the Ontario Government on a weed campaign this spring had to face. It is a question that is often heard in Saskatchewan and Alberta, too. As pointed out by John Buchanan of the Ontario Agricultural College, when such is the case it is a great nuisance, causes much extra labor and seems unfair.

Legislation against weeds may help the situation but there will always be people who will be more careless than others regarding weed control, but even in this case the innocent victim can help himself as weeds can be brought under control even in a field next to a dirty farm, or a highway or a railway where, too often, weeds have been allowed to go unchecked.

The Ontario Government officials found that many farmers were able to keep their weeds under control on their own farms despite the negligence of their neighbors and these farmers found it profitable to do the necessary extra labor because of the larger returns they reaped from their own crops. It was found that the use of good clean seed, clean cultivation, short rotations and the employment of

such another crops as sweet clover had brought weeds under control even in those fields next to the highway and the railway or just over the fence from farms where weeds had been allowed to grow luxuriantly.

But weed control, where the pests have been allowed to have their own way is a costly business. A case was cited of a field, so badly infested with twigs that it was not giving a crop worth harvesting, cost ten dollars an acre to clean up. Yet after this, with clean seed and clean cultivation, a crop worth several times ten dollars an acre was taken off every year.

The same principles applied to this farm in Ontario will work equally well in Saskatchewan and Alberta.—Saskatchewan Farmer.

U.S. MINISTER FINDS CANADA PROSPEROUS

The following is a copy of an editorial in the Manitoba Free Press, Winnipeg, on the report made by the Hon. William Phillips, U.S. Minister at Ottawa, to his government.

"A very favorable report on Western Canada is given by Hon. William Phillips, United States Minister at Ottawa to his government, following his recent visit to this part of the Dominion. He was greatly impressed with the progress of the western provinces as indicated by the growth and activity to be seen in all the larger cities. Each is dealt with in turn—the effect on the shipping trade and general prosperity of Vancouver, due to the Panama Canal; the benefit which Edmonton will derive from the settlement of the Peace River district; the building activity at Saskatoon. Winnipeg he describes as one of the most prosperous and progressive cities on the American continent. He also refers to the significance of the fine public buildings to be seen in the Canadian West.

"Mr. Phillips' impression was that this part of the Dominion was prosperous, and with what he saw or learned of the abundant firm land and many other resources awaiting development, he must have gone back with a confident belief in the progress and expansion in store for these provinces.

"The discovery of Canada by the people of the United States has been proceeding in a very satisfactory way during the last year or two. This highly favorable report of the United States Minister may help in the process and may bring wider attention to the opportunities available here for settlers and investors—as well as a new and interesting field for tourists."

PREPARE FOR SCHOOL

The summer vacation should be used to prepare children for school. Any parents who have been advised by the school physician or the family physician that their child is in need of medical care, and who have not acted upon the advice should attend to it without further delay.

The parent of a child who will enter school for the first time in the autumn

would be well advised to have the child examined by the family physician, in order to find out whether or not he is in need of any treatment.

Now is the time to have any physical defects corrected. "The child then has the summer in which to build up his vitality, and will enter school physically fit. There is no question that the child who is physically fit, is taught with, and who leads a regular hygienic life is the one who develops best both physically and mentally.

Children with diseased tonsils, adenoids, diseased teeth, or who require glasses are very definitely handicapped. Children who do not receive proper food, who have not sufficient rest, who do not play out of doors, are stunted physically and dulled mentally compared with what they should be.

Children should be vaccinated against smallpox and immunized against diphtheria before starting to school. This should be done in the first year of life, but if it has been neglected, it should be done now.

Questions concerning Health, addressed to the Canadian Medical Association, 134, College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

SUPERING FOR THE CROP

Supers for the storing of surplus honey should be given just as the honey flow is starting. This may be determined by the way the bees are flying busily in and out of the entrance of the hive, and by the presence of new wax built along the upper edges of the combs.

Supering for extracted-honey production differs from that of comb-honey production.

In extracted-honey production, the queen is confined to the brood chamber by a wire queen-excluder, and a super of extracting combs is placed above. When this super is about one-third full (which is judged by its weight) replace it by another one next to the brood chamber and put the first one on top. The order when giving the third super is: third one next to the brood chamber, the second above it, and the first one on top. After the peak of the flow, room is given less liberally.

In comb-honey production it is unnecessary to confine the queen below by an excluder, as she will seldom go above into the supers of sections. To get the bees to work in the sections, however, is sometimes difficult, and the following methods are suggested: (1) give the bees a super of empty extracting-combs; then, when they have started work in it, raise it up and place a super of sections between it and the brood chamber; (2) use extracting-combs as well as sections in the super; (3) use bait sections; or (4) run the colony in two chambers during the breeding season; then, remove the upper chamber and put on a super of sections.

The order of comb-honey supering is as follows: When the first super is well started it is raised to the top; and each successive super given is first placed next to the brood chamber and then raised to the top. Toward the end of the flow, give less space in order that as many sections may be finished as possible.

PRESIDENTIAL STATISTICS

Of previous presidents, eight have been Episcopalians, seven Presbyterians, four Methodists, four Unitarians, two Reformed Dutch, one Baptist, one Congregationalist, one Disciple, and one (Jefferson) of no church membership. There has never been a Roman Catholic president. Nor a Quaker. Smith is the one; Hoover the other. Roman Catholics constitute one-seventh of the United States population, while the Quakers are one of the very small religious bodies. But a contest of this kind is likely to result

in a line-up of Protestant against Catholic and not of Quaker against Catholic.

In profession, twenty presidents have been lawyers; Washington, a farmer and surveyor; Fillmore and Johnson, tailors. There has never been an engineer president. Hoover is an engineer. Al Smith likes to describe himself as a "graduate of Fulton Fish Market." Smith's father and mother were born in the "Bloody Fourth" ward of New York which contains the Bowery and Chinatown; so were Smith and his wife the latter a Cherry street girl, the sister of a policeman. Hoover, born poor, is probably the richest man who ever won the Republican nomination; a university graduate with degrees from at least two husbands at Leland Stanford university. Mrs. Hoover is a banker's daughter and met her ways in an election.

Of presidents since 1869, seven have been natives of Ohio, two of Vermont, one of New Jersey, one of

Provincial Weekly News Bulletin

(Issued by Publicity Commissioner, Government of Alberta, Edmonton, Alberta Highways to be Surfaced With Oil)

With a view to still further improving the condition of Alberta's main highways and reducing the cost of maintenance, a series of experiments will be conducted on a number of gravelled roads in the province during the next few weeks to test the efficiency of a covering of oil. It is announced by Hon. O. L. McPherson, Minister of Public Works, that a heavy asphaltic oil will be used in surfacing the roadbed for several miles on the principal highways. Satisfactory results are anticipated from this treatment which has proved highly satisfactory in a number of the eastern provinces.

Two Albertans on Canadian Olympic Team

Two Alberta athletes have been named on the track and field team which will represent Canada at the 1928 Olympic games being held this month at Amsterdam, Holland. Dorval Pilling of Camrose, will compete for Canada in the javelin throw and Stan

Glover of Edmonton has been chosen as a substitute on the relay team. Alberta, as well, will be interested in the performance of the Commercial Grads, Indian basketball team of Edmonton, International champions, who will take part in a number of important games at the Olympic, and in other centres on the Continent.

New Homestead Regulations Announced

The number of homestead entries at the various land offices in the province is showing a very marked increase as a result of new regulations announced during the past week from Ottawa. Under the new arrangements persons who had proved up on their homesteads prior to January 1, 1925, are entitled to file on a second homestead.

Northern Homestead Entries Heavy

The unprecedented demand for homestead lands in the northern part of the province is showing no signs of abating according to the records of the Dominion Lands offices at Grande Prairie and Peace River. At the former point 289 entries are reported during the month of June, making a total of 732 for the three months' period ending June 30, and at Peace River 300 entries in June have made up a total of 1040 in the three months. North-bound trains from Edmonton are still carrying their full quota of prospective settlers, the majority of whom are either filling on homesteads or purchasing farm lands in the north.

Travelling Clinic Active in North

The popularity of the travelling health clinics and the amount of splendid work done by those bodies on their visit to the Peace River country between May 10 and 19 is indicated by the report, just issued by Hon. George Hoadley, Minister of Health. As the result of the visit of the examining and surgical clinics to five different points in the north a total of 314 children were examined; tonsil and adenoid operations and other minor operations numbered 124; 23 patients were prescribed for; 279 children were given dental examinations; 144 extractions were performed and other necessary dental treatment was given to 123 patients.

KING EDWARD SCHOOL REPORT

Grade VII. Report
Promoted to Grade VIII. without examination, in order of merit: Marjorie Finch, Nellie Bidingler, Marjorie Montgomery, Gerald George, Estor Somers, Edith Kiefer, Mildred Morris, John Hans, Jean Peterson, Loreen Martin, Dudley Orr, Viola Provo, Dorothy Prest, Stanley Shaw, Helen Smith, Jack Walker, Fern Smith, Eunice Welsford, Betty Enarson, Alister Elliott, Sybil Liversidge, Terence Spencer, Harold East, Jack Kelley, Tony Roraph, Oriole Baker, Minnie Radomski, Norman Scott, Hazel Weir, Violet Parker, Doris Dayton.

Passed to Grade VIII. by examination:

Leavert Johnson	77.5
Russell Graham	76.2
Ernest Enarson	75.2
Jack Blickenstaff	71.1
Martha Klauert	70.8
Douglas Williamson	69.6
Edward Schneek	67.8
Edwin Lyle	67.3
Lawrence Johnson	67.1
Wilfred Gardiner	66.5
Orren Hardy	61.1
Lucy Entorf	59.9
Passed to Grade VIII. on trial:	
Thilmer Moen	62.1
Fred Meredith	58.5

PUPILS GIVE PIANO RECITAL

The following is the program rendered by the pupils of the Sisters of the Assumption, at the piano recital on June 23:

Duet, "Deeds of Valor," Zita Weller and Helen Smith; Solfege, Junior Pupils; Accompanist, Everett Lyle; solo, "Springtime Joys," Robert Blackwell; solo, "On the Deep Sea," Doris Dahms; duet, "Surprise for Papa," Doris Dahms and Teacher; solo, "The Bird's Lullaby," Grace Rice; duet, "May Day," Mrs. Rice and Grace; solo, "At the Party," Mrs. Rice; duet, "Recreation," Rene Beguin and Teacher; solo, "The Little White Kitten," Rene Beguin; solo, "Little Hungarian Melody," Catherine Moan; solo, "Yeasings," Frances O'Neill; duet, "Reverie," Frances O'Neill and Zita Weller; solo, "Slow and Sure," Edmund Christopher; solo, "John Gilpin," Kathleen Christopher; solo, "Bridal Wreath," Angela Anderson; solo, "Victoria," Dorothy Prest; solo, "Happy Farmer" (Schumann), Arthur McArthur; duet, "Festival March," Arthur McArthur and Everett Lyle; solo "Allegretto in F" (Rachmaninoff), Curt Paul Smith; solo, "A Sailing" (E. Moy), Irene Schmitz; trio, "The Sleigh Ride," Irene Schmitz, Edith Baxter, Frances Roultson; solo, "The Castle Ruins," (L. Schytte), Edith Baxter; solo, "Salute to the Colors," Frances Roultson; solo, "Morning Prayer," (Strauborg), Flora Stewart; solo, "Lilies," Lillian Jevae; solo, "Dance Espagnole," Mary Jevae; duet, "The Little Haymakers," Mary and Lillian Jevae; solo "Galeaty," Billie Maxwell; solo, "Wild Flowers and Butterflies," Helen Watson; solo, "Rondo," Sybil Liversidge; trio, "Les Glissades," (H. Van Gaal), Sybil Liversidge, Dorothy Prest and Helen Watson; solo, "March of the Drums," (S. Smith), Mabel Thompson; duet, "Ruit Britannia," (Josef Low), Zita Weller and Mabel Thompson; solo, "When Granny was Young," (Foster), Helen Smith; solo, "To the Moon," (F.

"Swat the fly" with GILLETT'S LYE

A teaspoonful of Gillett's Lye sprinkled in the Garbage Can prevents flies breeding

Use Gillett's Lye for all cleaning and disinfecting

Costs little but always effective

Swinstead, Everett Lyle; solo, "Butterfly," (C. Lavalley), Zita Weller; duet, "Pas de Charge," (T. Matto), Zita Weller and Teacher.

Distribution of the certificates of the Royal Academy of Music: Higher Division—Everett Lyle, Helen Smith, Primary Division—Curt Paul Smith, Irene Schmitz.

Prizes were distributed to all the pupils.

Special prizes for perfect attendance: Busts of Mozart, awarded to Helen Smith and Helen Watson. Mrs. Mann won the piano scarf prize.

P. C. PETERSON STILL TRAVELLING

Awakening in the morning at Williams, Ariz., we found it had frozen. This was the 23rd of April. There is quite a high altitude there, vegetation had just started to grow. For instance, the bull thistle was just peeping out of the ground, but as we drove south and west that day, in all 130 miles, we could see that everything was getting further advanced, so that at night the thistles had seeds and were done blooming, for we were then in the desert. The roses and lilacs had also finished blooming. On the way down to the desert we saw the most wonderful wild flowers and different kinds of cactus, some as high as 10 feet. We camped at Kingman, Ariz., 10 miles from the California line.

The next day we travelled through the desert; it was quite hot, but cool in the shade. That night we stopped at an oil station on the highway, about 50 miles east of San Bernardino, Cal., and saw our first oranges and lemons growing. We drove about 20 miles through villages, Pasadena and Los Angeles, and got to our daughter about seven o'clock that night. Now we know that some of you people have seen Los Angeles, but for the benefit of those who have not, we will describe it and tell you what we have seen there. First of all we might mention that Los Angeles has a population of about 1,400,000. They have just completed the city hall, which cost over \$6,000,000. We went to Luna Park Zoo and saw all kinds of animals, amongst them a lot of monkeys. Of course we took a special interest in them, as it seems they recognized us as descendants of their tribe.

The catfish farm was of special interest to us, also the alligator farm. We saw Almer McPherson's tabernacle, which is quite a large building, also Exhibition Park, comprising a good many acres. We visited the museum and other attractions, including the sunken rose garden. We drove

through Hollywood and saw several moving picture studios. On this drive we went up to Hollywood Bowl, which is a natural bowl on the side of a mountain, it has a seating capacity of 30,000 people.

One Sunday we drove out to San Pedro, which is some 20 miles south, but belongs to Los Angeles, and has a deep sea harbor. While there we visited a German boat named Gernar, and on talking Dutch to the captain, he gave me a real German Schnapps, which tickled my palate very much. We went to see our old friend G. A. Ferguson who is quite comfortably located in Glendale, a nice city adjoining Los Angeles. They were very glad to see us and we stopped a couple of days with them. While there, we had 'the pleasure of meeting Mrs. Somers' sister, who also lives in Glendale. Mr. Ferguson took us around the city. We saw the Forest Lawn cemetery, which contains a large mausoleum, built as near earthquake and fire proof as human skill can make it. There are two aviation fields, one belonging to the government and the other a private enterprise, where you can learn flying. They are now building a dirigible, based on the eggshell principle, 212 feet long and 58 feet in diameter, and supposed to travel at 100 miles per hour. We will now close and in our next letter will tell you about visiting Santa Monica, Long Beach and our drive to the Mexican border.

P. C. Peterson and Family. Our address for the next two weeks will be P. C. Peterson, c/o John A. Peterson, 343 1/2 N. 23 St., Portland, Ore.

ATTRACTIVE DISTRICT EXHIBITS AT EDMONTON FAIR

The Wetaskiwin District has arranged for space for an exhibit of Canadian resources at the Edmonton Exhibition, July 16-21. This will consist of all kinds of garden and field crops, flowers, etc., all of which have been grown and matured out of doors, not under glass, also a large variety of fresh vegetables and fruits. This is only one of the many interesting and educational exhibits which will be seen at this year's summer fair.

The Exhibition management have made a change in the regulations and Experimental and Government Institutions are forbidden to take part in the District Exhibits competition. A special class is arranged for such institutions and as a result both the Vermilion and Old Schools of Agriculture have already arranged for space for their exhibits. The Department of Agriculture, Ottawa, co-operating with the Canadian National Railways, are sending a very fine new exhibit.

The Provincial Department of seeds and weeds are preparing an exhibit which will be very interesting in view

Melotte
CREAM SEPARATOR
Breaks All Records in Clean Skimming
Low set receiving tank only waist high lined with porcelain and all former tinware parts now of clean, durable, rustless aluminum.
Automatic lubrication requires attention only once or twice a year. New Speed Indicator and its famous self-balancing bowl and square-cut gears make New Low Model Melotte the easiest machine in the world to operate.

MELON OF \$60.000 FOR POOL MEMBERS.
Calgary, July 9.—It was officially announced at the offices of the Alberta Wheat pool here on Saturday that interest at the rate of six per cent. would be paid on the commercial reserve fund which had been deducted from the final payments of the members for the past three years.
This fund was used to provide working capital for the pool, and now amounts to one million dollars.
The directors have now decided to pay interest on this deduction, and this will date from August 31, 1927. Approximately \$60,000 will be distributed in interest.

while they could do so when property was cheap. He stated emphatically that Alberta could equal any part of Canada in park and garden beauty, and cited the Galt Park at Lethbridge and the Hospital grounds at Oliver as outstanding examples, as wonderful advancement in this respect has been made during the last few years.

Hon. Mr. Hoadley announced the discovery of an inexpensive chemical that was very effective in weed destruction, but it would not be on the market until next year, as they wished to conduct further experiments this summer to prove its value as a weed destroyer.

Dr. Jenkins advocated stricter enforcement of quarantine regulations respecting contagious diseases, and in this way prevent its spreading, which would result in the saving of human life and large sums of money annually.

Mr. J. J. Smith gave a very interesting address on Assessment and Taxation. In the Province of Saskatchewan an Assessment Commission has been established for some years. The members of the Commission act as an Equalization Board, and fix the equalized assessment throughout the Province. They hear all appeals from Courts of Revision, and assist and advise local assessors, with the result that a fairly uniform assessment is being arrived at in the various Municipalities in Saskatchewan. Each member of the Board is an authority on assessment and taxation and are of great assistance to governing bodies.

Several resolutions requesting changes in the Town and Village Acts were adopted, and a few of general interest were passed.

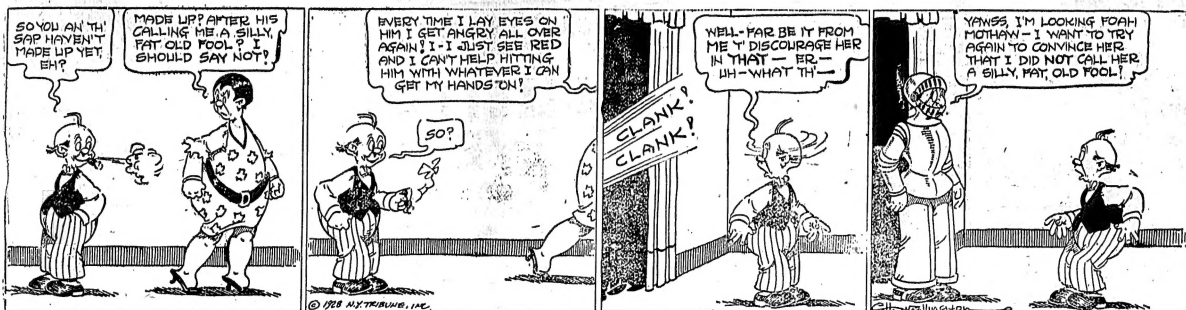

The building of an all Canadian Highway from Coast to Coast by the Dominion Government was heartily endorsed, Mayor Montgomery suggesting that it be named the "Confederation Highway."

The Research Bulletin published by the organization and edited by Mr. J. E. Fraser, came in for general commendation. Two issues have been already published and the Convention unanimously agreed to have it published for another year at least and issued every three months. Mr. Fraser was reappointed as Editor in Chief. Copies will be sent to each member of the Council in Villages, Towns and Cities, and also to each member of the Legislature. The subscription fee will be \$1 for each village, of which there are 131 in the Province, and \$2.00 for each city and town. There are 6 cities and 5 towns, or a total of 191 Urban Municipalities in Alberta.

A very interesting discussion led by Mayor Osborne and Commissioner Graves of Calgary, Mayor Bury, Commissioner Mitchell and Superintendent Cunningham of Edmonton, and others, took place on Public vs. Private Ownership of our Utilities. It was recognized that the small centres could be better served by power companies from a large central distributing plant, but the larger places should endeavor by all means to retain their franchises and operate under public ownership. It was shown that many of the figures published by private companies now seeking franchises throughout the Province were misleading and untrue, and that public ownership was invariably as cheap, or cheaper, than private companies, were just as efficient, and much more satisfactory. It was generally agreed that when you parted with your franchises your troubles started.

Perhaps the most interesting and

PA'S SON-IN-LAW

Westminister Glee Singers Will Give Recital Here

Under the distinguished patronage of H. E. the Governor General, Lord Willington, the Westminister Glee Singers will give a recital at the Angus Theatre, Wetaskiwin, on Thursday, July 19th, at 8:30 p.m.

This body of singers enjoys a unique reputation. It is composed of men and boys selected especially from the greatest of English cathedral choirs and constitutes a complete choir with a repertoire of one hundred and fifty pieces.

Some of the finest voices from Westminster Abbey, St. George's, Windsor, Christ Church Cathedral, and old St. Paul's are included in the organization.

Recently the Westminister Glee Singers completed two years' travel in Australia, New Zealand and India, and they are going to Australia again, this time via Canada, in response to an insistent public demand. During their tour they gave 625 performances. Whether in the boys' singing, or in

the men's work, or in the combined performance of the complete choir, those who know something of the beauties of English Cathedral song will renew old and precious memories when they hear this body of singers.

The British Empire has the greatest known natural gas field in the world, in Alberta.

The great teak forests of Burma are the finest in the world.

EDITOR ATTENDS

(Continued from Page 1)

brought to bear all the ingenuity of skilled architects and engineers. The walls have been built of logs and stone, the wood stained a natural brown, the stone a natural glistening white. The roofs of all the buildings are given to that the whole effect is one of harmony with the natural scene and beauty of the surrounding landscape. The grand old carved woods have been cleverly used for decorative effect in the building of the interior of the main lodge and the verandah supports of the bungalows and this feature is one of general delight and admiration.

Immediately in front of the Lodge lies Lac Beauvert, whose waters on a cloudy day change color as an opal, and, when the air is still and clear, provide a perfect mirror wherein is reflected all the grandeur of the encircling hills.

Within one hundred yards of the main lodge is located the club house and first tee of the famous Jasper Park Lodge Golf Course, acclaimed by experts as the most perfect 18 hole golf course in the world.

For those who are interested in mountain climbing, expert Swiss guides are available at the Lodge.

Trail riding is another popular pastime. The trails are delightful. They run their wanton way hither and thither, now in the valley beside the streams and lakes; now through the sweet scented woods; now on the wind-swept uplands where the most gorgeous fields of flowers bloom at the very foot of the snows. But wherever they go, high or low, they are byways of unending charm of never-fading delight.

A NEW ALBERTA INDUSTRY

The Dominion Government has granted a charter of incorporation to Nu-foods Limited, a company formed to manufacture an entirely new breakfast food, and other food products, embodying new principles in food preparation. This remarkable food was introduced within the last year

on the English market by London's greatest baking company, H. W. Nevill Limited, where under the name of Nevill's Breakfast Food it has received a sensational reception.

Mr. R. K. Peck of Edmonton, who has been a Westerner for over 28 years, while with the Canadian National Colonization Department in England last year, secured the manufacturing and selling rights for Canada and the United States. Nu-foods Limited has been formed by prominent Alberta men to take over these rights and to establish an Alberta factory for the manufacture of these products.

Nu-food is a fully prepared food consisting of an entirely new combination of whole wheat, nuts and fruit juices and certain secret ingredients of special health value hitherto unknown in food proportions, scientifically balanced as to vitamin content, nourishing and satisfying, having the correct protein, fat and mineral proportions to meet the daily needs of brain and body. The result of years of research by one of England's foremost food scientists, it may be said to have finally solved the problem of the complete and perfect food.

Alberta welcomes new industries, especially one which provides a new outlet for her own products. Her greatest product—wheat—being a large factor in Nu-food, Alberta is the logical place for its production.

With Alberta men, such as Dr. F. S. McCall of Alberta College, widely known, H. W. B. Douglas of the well known Douglas Printing Co., C. M. Tait, an Albertan for over 25 years, and I. B. Howatt of Howatt and Howatt, Barristers, behind the enterprise, and with a food-product the value and excellency of which is endorsed by our former Premier, Hon. H. W. Greenfield, A. McGavin of McGavin's Ltd., with their extensive interests from Colorado to Alberta, and British Columbia, W. W. Prevey, managing director of the Edmonton City Dairy and many others, the company's successful promotion is assured. The registered office of Nu-foods Limited is at 219 McLeod Building, Edmonton.

LINDSKOG'S HOMER
BASHAW SENSATIONCentre Fielder Electives Tournament
Crowd by Making Circuit on
Smash Over Initial Cushion

In the tournament Tuesday at New Norway, Camrose won from the Double-ends 9-4, the Wets lost to Bashaw 8-7 in extra innings and Bashaw trounced Camrose 9-4 in the finale.

No, dear reader, that heavy crash you heard on Tuesday afternoon was not a peal of thunder. It was the resounding echo of the home run crash contributed by Earl Lindskog, whose blemishing physio will now take its place along with that of Babe Ruth, Roger Horaby and others in the Hall of Fame. The crash was rapped off the local centre fielder's club in the fourth inning and he had no difficulty in negotiating the circuit before the pill was relayed into the home plate.

"He says that he is in close touch with the heads of many organizations." "Yes, he's a barber."

MAY ENTER PLAY-OFFS

The Wetaskiwin Battle River League team is considering the practicability of entering the provincial intermediate championship playoffs. A definite decision will be arrived at this week.

GULLS TAKE UP GOLF?

It would seem that Californians, the large white gull so much in evidence around town, in common with the majority of visitors here, cannot resist the lure of the local golf course.

While enjoying a game last Tuesday night with Bert Groves, Frank Player was surprised at receiving unexpected assistance from a pair of the feathered sports.

Mr. Player had driven from the 5th tee and was proceeding to take his second shot when a large white gull swooped down, picked up the ball and dropped it upon number six fairway. Despite a frantic rush to retrieve his ball, Mr. Player arrived too late to prevent a second gull from securing the ball and, after carrying it twenty yards, dropping it in the rough of the same fairway, Frank is still undecided as to the rule governing the situation.—Camrose Canadian.

"I've just killed five flies—two males and three females."

"How could you tell?"
"I caught two on the card-table and three on the mirror."

SPORT EVENTS AND MEETINGS DELAYED BY MOSQUITO PEST

Winnipeg, July 4.—Scores of persons are being treated in the various hospitals for inflammation, resulting from mosquito stings. Nothing like the plague of these pests has ever been seen in similar seasons. They appeared in vast swarms Dominion Day, breaking up picnic parties, and forcing all outdoor meetings to be cancelled. They are of the poisonous variety and leave blotches that inflame rapidly at every bite.

Golfers have abandoned the sport and all stockinged legs near grass are no longer comfortable. Stock in the town are suffering so badly that farmers have been forced to keep smudges burning day and night. This plague followed immediately upon a very expensive campaign for the destruction of the pests. Sports of all descriptions in the open have been abandoned.

STAMPEDE AT GWYNNE

A big stampede is to be staged at Gwynne on July 25th and 26th, with a very attractive program of events. \$2,000 in cash prizes are offered. The Coal Lake Boys' Band will be in attendance both days. See posters.

ELEVATOR POLICY MARKED SUCCESS

Calgary, July 8.—That the remarkable development of the Canadian Wheat Pool's elevator building program was a fitting tribute to the worth and permanency of the pool, and that this was being amply demonstrated throughout the three prairie provinces, was the statement made by W. A. MacLeod, of Winnipeg, publicity director for the Canadian Wheat Pool, who was in the city on one of his periodical visits.

The wisdom of the pool's plan of co-operative marketing, he said, was becoming daily more apparent in the increased enthusiasm among agrarians of the west. That had been much supported by the elevator policy. There were now about 1,300 elevators at country points, which represented a capital investment of more than \$20,000,000. This money

was really the savings made by the farmers conducting their own business and was in addition to the most satisfactory prices received for their grain.

Mr. MacLeod said that the general outlook of the pool was exceedingly satisfactory.

"HE LAUGHS BEST"

Winnipeg, Man.—For stopping his automobile on a highway crossing in the path of an approaching Canadian National Railway freight train just recently east Laurier Thibodeau of Quebec more than one hundred dollars and costs. Thibodeau was crossing the tracks and noticing the approaching train became curious to know what an engineer would do should he find an automobile parked on the tracks, so he decided to stay and find out.

For the crossing and noticing the automobile parked on the railway tracks applied his emergency brakes. He was successful in stopping his train before striking the car. Immediately the train came to a stop, Thibodeau drove off laughing, but the train crew secured his license number and he was arranged before Judge Lemay, at St. John, Quebec.

In the emergency stop, considerable damage was caused. He was severely lectured by Judge Lemay, who said he not only endangered his own life, and those of his two companions, but also those of the train crew and the property of the railroad. The only thing which saved him from more severe punishment, court informed him was that he was the support of his widowed mother.

DON'T READ THIS

If your subscription is paid. If it is, you can tell by examining the date on the label. This date shows when your subscription was or will be due. Subscriptions paid during September were very few indeed, but we understand the cause—the grain is not yet harvested and money is very tight.

But October should be better, and we do not wish to harass anyone with a little bill like a \$2.00 subscription. We believe most people, as soon as they can spare the money will be glad to pay this small item. We appreciate the distinctness of this season's financing, and have endeavored to say as little about subscriptions as possible.

But we expect our delinquent subscribers to "come through" just as soon as they can.

CROPS BURNING UP

Mexico, City, July 4.—Cattle are dying, crops burning up, and farmers are facing heavy losses, and some of them, in many parts of Mexico, as the result of one of the worst droughts the country has ever known. Conditions are worse in the central states, the granary of Mexico, where the corn crop is almost ruined, and in the cattle and grazing regions to the north between Mexico City and the border. Some of this territory has had no rain to speak of for a year.

PREMIER VISITS PACIFIC COAST

Edmonton, Alta., July 9.—Premier J. E. Brownlee left Sunday for San Francisco, Berkeley and other Pacific Coast points, the main purpose of his trip being to deliver an address before the American Institute of Co-operation being held at the University of California, on "Governments in relation to the co-operative movement."

SOME OF THE FAIR DATES

Calgary July 24-25.
Edmonton, July 16-21.
Lacombe, July 30, August 1.
Stettler, August 2-3.
Alx, August 3-4.
Camrose, July 26-27-28.
Red Deer, July 23-24-25.
Olds, July 25-26.

Vancouver is the chief wheat-shipping port on the Pacific coast of America.

Canada is the chief wheat and flour exporting country of the world.

NOTICE OF SALE

Notice is hereby given pursuant to a Bylaw of the City of Wetaskiwin that:

One Brown Mare, age 6 or 7 years, weight about 1,000 lbs., white star on forehead, white ring round left hind foot, forefoot has been trimmed and grown out; long mane and tail; no visible brands.

Was impounded in the pound kept by the undersigned, located at Johnson's Livery Barn, Lorne Street, Wetaskiwin, on the 18th day of June, 1928, and that the said animal was sold to Carl Hogan of Battle Lake on the 30th day of June, 1928, and that the said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in the Alberta Gazette, upon payment of all fees and costs due to the City and the purchaser of said animal.

For information apply to the undersigned.

(Signed) J. E. FRASER,

Secretary-Treasurer,

City of Wetaskiwin.

SEVERAL INSTITUTES OF CO-OPERATION TO BE HELD NEXT YEAR

Edmonton, July 8.—Several local institutes of co-operation will probably be held next year. Instead of one, says Hon. George Hoadley, in behalf of the trustees of the wheat board surplus, under whose auspices the provincial institute at the university last week was conducted. Three of the agricultural schools will likely be chosen for the institute centers, with one also in Calgary, the idea being that the series will be arranged so that the same list of speakers will attend them all.

Mr. Hoadley says that last week's institute, the first of the kind to be held, was a pronounced success and surpassed expectations. Visiting experts from across the line expressed themselves as greatly impressed with the interest in co-operation displayed by Alberta people, 500 of whom were at the institute meetings, and Prof. C. R. Fay, of Toronto, said it was the best event out of many of the kind that he had ever attended.

The results of the institute have encouraged the trustees of the board to report on a larger scale, but localized in several different centres.

The cost of the recent institute was met out of the surplus funds from the wartime Canada wheat board, an appropriation of \$12,500 having been made for the purpose out of Alberta's share.

THIEVES AGAIN LOOT EDMONTON JEWELRY STORE

For the second time in five days, robbers broke through the window of the P. R. Thomas jewelry store at 10445 Jasper avenue early Thursday morning and stole two watches with a total value of about \$75.

A hole barely large enough for an arm to be stuck through was cut by glass-cutters, the glass being cut in a semi-circle and then being smashed out. The hole was discovered at 1:50 a.m. by a constable on duty and despite a search of the district the robbers were not found.

The Thomas jewelry store was broken into Saturday morning last when the same window was smashed. On this occasion the robbers took rings valued at \$400.—Bulletin.

Mr. Thomas was a partner in H. R. French's jewelry store for a number of years before going to the Capital City.

FINAL BUFFALO SHIPMENT

Wainwright, Alta., July 9.—Last week's shipment of buffalo brought the season's quota up to 1,000 head, which will probably be the final allotment to the McKenzie river district.

At the present time, pemmican, prepared from buffalo meat, put through the park abattoir, by P. Burns and company, last winter, is being shipped to an eastern port for transportation to the natives in the eastern Arctic.

Already consignments have been forwarded by water to the Eskimo in the vicinity of Akivik where it is understood to have met with considerable favor.

Australia is the chief wheat producer of the Southern Hemisphere.

TEACHERS WANTED

WANTED—Teacher for Grand View S.D. 941. Holding second class certificate. Salary \$800 for the school year of 200 days, from Sept. 3, 1928, to July 1, 1929. Apply to Secretary-Treasurer, Albert Lieske, R2 Millet, Alberta. 17-2t

CHERRY CROP HARMED

Kelowna, B.C., July 5.—Fifty per cent of the cherry crop in the Okanagan Valley has been destroyed by rain, according to conservative estimates. On the basis of government estimates of the cherry crop for the current year at 90,000 crates, worth on an average of two dollars a crate, a 50 per cent loss would amount to \$90,000.

Nowhere else but in a "SALADA" package can you obtain such high quality tea for so low a price and be sure that such quality will continue. Try one package! If it does not please you, your grocer will gladly refund you your money.

Free Speech and the Right of Trial

(From The Golden Age of June 13, 1928.)

Mr. Arthur Black Farmer then addressed the audience and said:

Mr. Chairman, Ladies and Gentlemen:

It is not my practise in speaking to an audience to put over what one minister described as warmed-over enthusiasm, but rather to speak extemporaneously. However, on Saturday I was prompted to receive a letter from a prominent minister who stated he had been telephoned by quite a number of ministers in Toronto expressing their disappointment at seeing me advertised in connection with this meeting. In view of this unexpected expression of interest and so that there may be no misunderstanding as to why I am here and in regard to what I may say, I have put in writing my remarks and shall adhere to them as closely as possible.

Mr. Salter speaks to you this evening as a representative of the International Bible Students Association. Mr. James Simpson speaks as the Vice-President of the Trades and Labor Congress of Canada. I speak for myself alone.

I am a Baptist. I am a son of a man who for forty years trained men for the Baptist ministry. I have been steeped in Baptist doctrines and traditions and I may say that I am more

profoundly and enthusiastically a Baptist today than ever before in my life.

Also I am a Canadian, born of Canadian parents, and on one side of Canadian-born grandparents, all of British stock. I am deeply conscious of the privilege and of the responsibility of my British citizenship.

Because I am a Baptist I must take my stand for freedom of speech whenever intolerance by whatever name it may call itself places freedom of speech in jeopardy.

Because I am British I must take my stand for British justice and liberty when the traditions of British justice are threatened.

These are the reasons I am here tonight to join in the protest against the refusal of the Government to renew the radio licenses of the International Bible Students Association.

Baptists, you must know, are a somewhat peculiar people. Some say we are a disagreeable people because we disagree with each other religiously on some point or points of doctrine or practice, and have shown some decided tenacity in our adherence to what seems to others unimportant, but to us important details.

While maintaining our own peculiar views and methods we gladly cooperate with others where grounds for agreement can be found; first with those who like the Disciples are nearest ourselves in belief and practice; next with all who accept the Old and New Testaments as the sufficient revelation of God in matters of belief and practice but who differ in interpretation or emphasis; in other matters with those who like the Jews accept the Old Testament but not the New; more broadly still with all who believe in One God, a God of truth, justice and love; and finally in some matters even with those who, like the Confucians, without definite dogmas of deity may believe in promoting the welfare of mankind.

One of the central Baptist teachings is that of the final individual responsibility of each from the highest to the lowest in matters of belief and action to God Himself.

That doctrine involves the obligation to allow to every other human being the right to think for himself, to reach his own conclusions, and, if he wish, to express those conclusions no matter how far his conclusions may differ from what has been generally accepted.

That doctrine of individual responsibility to God is the rock on which Baptists have set their feet throughout the centuries in their stand for freedom of thought, for freedom of worship, and for freedom of speech. It was the doctrine that brought about in the state of Rhode Island two centuries and a half ago, under the leadership of that great Baptist, Roger Williams, the first state proclamation of liberty of worship to all. In two short centuries what was then considered a very dangerous Baptist experiment has become a generally accepted principle throughout the English-speaking world.

Every man I suppose considers himself tolerant. It is so easy to be tolerant of the expression of ideas with which we fully agree or ideas which we consider unimportant, toward which we are indifferent.

There is no virtue in indifference. There is no virtue in your support of the rights of others to proclaim views with which you agree.

The test of your tolerance, yes, the test of your genuine convictions, the test of your genuine, deep and final belief in the supremacy of truth and of God Himself is your readiness to defend the right of the other fellows to proclaim his beliefs when they differ from yours, yes, even when in your belief they are misleading and dangerous.

The Spanish Inquisitors were most tolerant of the public proclamation of orthodox Catholic doctrines of their time. It was only for the preaching of doctrines which they believed immortal souls of the people that they felt called upon to suppress free speech with the faggot, the thumb-screw and the stake. Let no one who today favors the cancellation of this radio license because of the unpopularity of some of the doctrines that

have been broadcast from this station imagine for a moment that before God he is one whit better than the bloodiest of the Spanish Inquisitors.

Neither truth nor error may be compelled by force or law. "Truth crushed to earth shall rise again." Error driven into darkness by means of force multiplies like mushrooms in a dark cellar. The best way to dispose of error is to bring it out into the fresh air, and expose it to the open sunlight of criticism.

If you and I worship an all-powerful God of Truth we will understand that in the providence of God the preaching of errors must be permitted to stimulate the proclamation and the acceptance of the truth which must prevail; and if we really bow before a God of Truth instead of worshipping at the shrine of our own vanity we will be happy in the confidence in the ultimate victory of truth even though that victory may show in some instances that we ourselves have been the ones in error.

Of three thousand people in this great audience, three thousand thinking people, perhaps no two agree in all their beliefs. Each and every one of us must be wrong in some points. Shall we not defend the right of each to proclaim what seems to him to be the truth, however it may appear to us, glad in the faith that in God's good time truth will prevail, and somewhere, sometime, we shall know and our errors shall be corrected.

Tolerance is a proper evidence of conscious strength.

If you were in Hyde Park, London, today you might hear men with strong words and the bitterest invective attacking everything in the British Commonwealth of Nations from the Royal family to the private life of the common people, and if you saw a British policeman keeping order in the crowd listening to such a speech and protecting the speaker you would realize that here was the most convincing evidence of the conscious strength of the British Empire.

When early in the Great War confidence in the strength and integrity of this Empire was for a moment shaken the very suppression of such freedom was a public confession of fear and weakness.

It is charged that Judge Rutherford last summer, speaking over CKCX at the Toronto Exhibition grounds, declared his belief that the British Empire is an instrument of Satan. If he did, some of us may question the propriety, the good taste of making public announcement of such a belief at such a time and place, and I can understand the people who really believe that the British Empire is tottering becoming quite excited about such an announcement of belief and contending that such a man should be silenced for ever. But those of us who may be inclined rather to hold with W. G. MacKendrick and others that the British Empire is an instrument of God and the fulfillment of prophecy can have no fear of any ill result from the proclamation of Judge Rutherford's opinion. We will rather welcome the discussion such an announcement may stir up. I should love to hear Judge Rutherford and Mr. MacKendrick debate that subject with a good book-up of radio stations.

Throughout centuries of struggle the British people have endeavored to establish the principle that no man must be deprived of liberty or property without a fair trial.

The establishment of that principle has cost the blood and the lives of noble men and women.

The true Briton is not the noisy flag-waver but the man or woman who will sacrifice in defence of the one best of the British traditions, traditions of liberty and justice in defence of the weak and the unpopular.

The discovery of radio opened up a new field for human activity.

The opening up of new fields has been a constant feature of British development.

When a new township in Canada is opened for settlement and farms are allotted for cultivation, it is an accepted principle that the man who has been allotted a farm, provided he meets the conditions of that allotment and develops his land, can not be ejected without due process of law.

If some of his neighbors disapprove of some of his beliefs or activities, it is not enough that they protest to some government bureau. When he has invested his capital and his labor in the development of that land any effort to deprive him of his holdings must be by due process of law.

Radio has opened up, I said, a new

field of human activity, the field of broadcasting. The broadcasting field is limited by wave bands as definitely limited as the area of a new township. When wave bands have been allotted and capital and labor expended in broadcasting it is not in harmony with British traditions that such allotments should be cancelled by mere bureaucratic action. It is as necessary that British principles of justice shall prevail in this field as in the opening up of a new township. To refuse a license because of the opinions of the applicant is as wrong as to refuse the application for a farm in a newly opened township for similar reasons, while to refuse renewal of a license already granted is as contrary to British principles as to cancel a man's title to a farm to which he has devoted capital and labor because of his religious or political opinions.

To deprive a man or a group of liberty or property without fair trial, without due process of law, is treason against the British Empire, treason of the worst kind. It is the kind of treason that undermines, subtly and effectively, the very foundations upon which the greatness of our Empire has been built.

As a believer in the right and the safety of freedom of speech, and as a believer in the sacredness of the institutions of British justice, I protest against the action of a government bureau in refusing the renewal of the licenses of the International Bible Students Association. (Adv.)

Another Way to Say the Finest of Low Priced Sixes

JUST as the "sterling" imprint on silver identifies the best, so the mark of Fisher on its bodies distinguishes a car from others in its field. When you speak of Pontiac as the lowest-priced six with bodies by Fisher, you are merely finding another way to say—"the finest of low-priced sixes."

For no other six of such low price offers the score of advantages which make the Pontiac Six the value leader of its entire class. Certainly none other offers any major feature comparable to the staunch, smart coachwork that the Fisher emblem represents.

Not only in style and color—not only in roominess and luxury of interiors—but also in sturdiness and quality of construction, Pontiac-Fisher bodies establish a standard never before attained in a six at Pontiac price. Like Pontiac itself, they are noted for ruggedness and long life. Like Pontiac itself, they provide every element required for complete satisfaction and for justifiable owner pride.

Ask your dealer about the G.M.C.A. Deferred Payment Plan which makes buying easy.

CERTIFICATION OF SEED POTATOES

The certification of seed potatoes has been carried on for a number of years. It has become an established and very necessary factor in the ever increasing internal and external trade in this commodity which has developed in recent years. Seed potato certification is important both from the purchaser's, as well as from the grower's standpoint. One does not have to look far back at the time when almost any potato was merely taken at its face value and planted more on its appearance than for any inherent quality of productiveness it might possibly possess. On the other hand, a seed potato today in order to be classed as such must almost have a pedigree. Certification is a means to that end.

The information gained through experimental and pathological research of the many diseases affecting the potato is voluminous. The best-looking seed potatoes might be heavily affected with serious diseases to such an extent that the crop produced therefrom would be scarcely worth harvesting. Hence the need for some guarantee, preferably backed by government official standards and inspection, on which the purchaser of seed potatoes can depend, and which assures him, in great measure at least, that the stock he purchases will, under normal conditions, produce a satisfactory and maximum crop.

The work performed by the Inspection Service is two-fold. First of all, each inspector acts as an extension man. He must be prepared to carry information obtained through experience to the grower. This includes not only a knowledge of the diseases affecting the crop, but also the most up-to-date methods of disease control, to say nothing of the multitudinous questions relating to soil types, cultivation, fertilizers, machinery and many other phases relating not only to the growing of the potato crop, but also to other

farming activities. This personal contact with the individual grower has been of inestimable value.

Secondly, the inspector has to act as the medium through which the crop is certified. The official tag is given to the grower only after his crop has passed at least two field inspections and two or more tuber inspections, and has been found to conform to the standards set for that purpose.

Certified seed potatoes are today recognized as being superior in every respect to other stock. They are practically free from serious diseases which affect the yield, are more true to type, should have no admixture of other varieties, and are of higher yielding quality, and are better graded. When purchasing potatoes ask for "Certified" and be sure the official tag is attached.

For further information on this subject see Dominion Department of Agriculture, Pamphlet No. 84, New Series; or write to the Dominion Botanist, Central Experimental Farm, Ottawa, under whose direction the work is carried on.

THE OWL AS A FRIEND TO MAN AND BIRD

The owl, usually believed to be a destroyer of birds, is the most misrepresented bird in the world, and farmers in Australia and California have appreciated this when their lands were overrun with rats and mice, we read in an interview with Lewis W. Walker in the New York Sun. "Owls do occasionally come home with feathers sticking out of their beaks," admits Mr. Walker, "but this is nothing compared with the protection they afford the birds of a neighborhood by their slaughter of the rodents, which destroy the eggs of the birds, in the nesting season in devastating quantities. Generally there is a feeling that it is a good thing to kill owls because they are supposed to prey on other birds, and on poultry, and the farmer, fearing for his poultry, is himself given to shooting them. It may be true that the owl is an enemy to an individual bird from time to time, but never-the-less he is a friend to the species," declares Mr. Walker.

The model marriage is one in which the wife is a treasure and the husband a treasurer.

Dizzy Spells Shortness of Breath Was in Awful State

Mr. W. A. Smith, 343 Alexander St., Vancouver, B.C., writes: "When I reached the age of 40, all kinds of ailments seemed to take a crack at me, all at the same time. I had dizzy spells, shortness of breath, and everything would turn black before my eyes. Doctors claimed it was kidney trouble. I went to a specialist and he said I was on the verge of a nervous breakdown. I truly was in an awful state. "I took various kinds of medicine, but they did me absolutely no good, until, one day I met a friend who had been overseas and was in the habit of taking nervous spells, the result of his overseas service, and he told me to get

and take them according to directions and I would feel the benefit after the first few doses. I did as he told me, and altogether I took six boxes, and they relieved me of my nervous condition. That was three years ago and my nerves, to-day, are in perfect shape."

Mrs. Mackay and daughter Alice, motored from Winnipeg and are guests of Mrs. Mackay's parents, Mr. and Mrs. F. Pacey.

Mrs. H. Beckley and niece Miss Gladys Montgomery, motoring from Los Angeles, Calif., were guests of Mr. and Mrs. A. D. Rupert.

Mrs. A. H. Parker and little daughter Ethel, are in Calgary, where they went last week to meet Mrs. Parker's sister arriving from overseas.

Master Fred Maund arrived in town on Sunday evening and is spending a week with his uncle and aunt, Mr. and Mrs. A. P. Mitchell, and sister Alice.

Mrs. Henry Brinker was the guest of the Rev. A. B. and Mrs. Lane at the Vicarage, Golden for a few days, en route to the coast, and took in the Sunday services there.

Miss Helen Jean of Edmonton, was the guest of Mrs. Graham since Wednesday, returning to the city on Sunday with her parents, who motored out during the afternoon.

Owing to weather conditions, the lawn social under the auspices of the Women's Institute at the home of Mrs. H. Arnold, has been postponed until further announcement.

Mrs. J. R. Dyer, accompanied by her two children, Mabel and Clayton, returned to her home at Westlock, Sunday, after spending a week with her parents, Mr. and Mrs. P. Chelson of Porto Bello.

At the Baby Clinic held in the Community Hall on June 26, under the auspices of the Public Health Department, twenty-nine babies were examined by Miss Emerson, Public Health Nurse. More should take advantage of the opportunity that this clinic affords in the Better Babies movement.

Two faces were close together, the man's grim, tense; the other face was small and white, with two slender hands pressed tightly against it. It was those frail hands that riveted the man's horrified gaze. "Heavens!" he said, still staring; and in his voice was hopeless, stark tragedy, for that other face was the face of his watch, and those little hands told him that he had missed the last train home.

They were looking into the depths of the Grand Canyon. "Do you know," asked the guide, "that it took millions of years for this great abyss to be carved out?" "Well, well!" commented the traveller, "I never knew this was a government job."

The cool, comforting flavor of Wrigley's Spearmint is a lasting pleasure. It cleanses the mouth after eating—gives a clean taste and sweet breath. It is refreshing and digestion aiding.

THINK IT OVER!

Doest thou love life? Then do not squander time, for that's the stuff life is made of.—Franklin.

SCHOOL PUPILS HOLD PICNIC

Millet athletic grounds were the scene of a happy event on Saturday afternoon, when the pupils of Millet and surrounding district schools held their picnic.

A capacious booth with large supplies of ice cream, melon, candy and soft drinks, was well patronized, with the Misses Irene Anderson, Blanche Van Valkenberg, Gladys Kerr and Clara Grapentine serving.

A boys' baseball game between Millet and Wetskiwin was well played and resulted in a score of 12-10 in favor of Millet. Mr. E. J. Olsen was a very efficient umpire.

Following the ball game a series of children's races were carried out, many prizes being distributed to the little winners. Mr. Tuckey, principal of the high school, was present and assisted in the conduct of the races. Much credit is due the School Board for the successful day, after having had two postponements.

Here and There

(89) Half a million automobiles from the United States and the provinces of Canada, carrying a million and a half persons, will enter Montreal during the coming tourist season, according to the estimate of the Montreal Tourist and Convention Bureau.

The use of the combine is expected to be more general than ever in the 1928 harvest. In 1926 there were 76 combines in the Prairie Provinces, 148 being in Saskatchewan, 26 in Alberta and 2 in Manitoba. In 1927 there was a total of 630 in Saskatchewan, 221 in Alberta and 23 in Manitoba, 774 in all.

There is considerable tree planting activity along the Medicine Hat division of the Canadian Pacific Railway. At Shackleton alone twenty-five bundles of small trees were received, and a day from the Forestry Branch at Indian Head, Saskatchewan, and all are now planted. Clung and other villages are competing actively.

Equaling the speed across the Atlantic made by passenger liners of medium size, the five 10,000 ton vessels of the "Beaver" class have been achieving records in oceanic freight transportation for the Canadian Pacific Steamships. The speedy quinets of freighters joined the company's fleet this year and have been running on as frequent and rapid a schedule over the Canadian route as Europe as many passenger boats.

Chicago. — "Smiling Billy Hogan," veteran C.P.R. conductor, took "The Mountaineer" Canadian Pacific flyer from Chicago to Vancouver out in its initial run of the season this year. The train is one of the "Big Five"—C.P.R. trains de luxe opening from Chicago and the east of Canada across the continent during the summer. Conductor Hogan joined the "Big Five" in 1888 as stoker on the old Wisconsin Railway, and is to-day one of the veterans of the company.

Montreal. — A new era in Canadian trans-Atlantic passenger history, has been inaugurated in Montreal, where the fine new liner "Duchess of Bedford" docked recently. The new 20,000 ton vessel, the largest to ascend the St. Lawrence to Montreal, is the first of four cabin class sister-ships of the new "Duchess" type, which will supplement the Canadian Pacific's trans-Atlantic and winter cruise services. Speakers at the banquet held on board on arrival in Montreal after her maiden voyage eulogized the occasion as an event of national significance.

The Feast of St. John the Baptist, greatest of French Canadian religious spectacles, will be celebrated throughout the province of Quebec shortly. The Montreal baseball stadium, which will accommodate 25,000 persons, will be crowded by spectators of a French Canadian oratorio, to be followed by a spectacular fireworks display. On the Sunday afternoon, thirty floats, depicting French Canadian songs, many bands, and over 10,000 singers and minstrels, will come together in a procession several miles long through the streets of Montreal.

MODERN DEFINITIONS

Automobile: A four-wheeled obstruction capable of standing for hours at a stretch in a congested street while its owner is goodness knows where.

Parking Space: A place where you leave your car to have all those nice little dents made in the fenders.

Street: A narrow public space needed for traffic and used for parking automobiles.

Traffic: A procession of automobiles looking for parking space.

ADVANCE STYLE NOTE

Wife: I wonder what the fashion in hats will be next fall?

Husband: Same two styles as usual, I suppose. The style you don't like and the style I can't afford.

HILLSIDE

A number of the school children took in the school sports at Millet on Saturday and carried off a few of the prizes.

Mr. H. Marr is erecting a chicken house and barn to replace those that were burned in the spring.

The regular U.F.A. meeting will be held at the home of J. O. Harvey on Friday evening, July 13th.

Owing to the Pastor, Rev. MacDonald, being at the Lake with the Trail Rangers, there was no church service Sunday.

Miss Barbara Marr is home for the summer holidays.

Mrs. J. G. Bolt's children were Wetaskiwin visitors on Saturday.

Miss Beth Hovos, who has been teaching the Porto Bello school, is spending the holidays at her home here.

Mr. and Mrs. L. E. Marr were Edmonton visitors this week.

Mr. W. English of Wetaskiwin, spent the weekend with Mr. and Mrs. W. Webb.

The July meeting of the U.F.W.A. was held at the home of Mrs. T. Leader on Friday last. There were nine members present, each responding to the roll call with "How to make our husbands happy." Feeding them well seemed to be the only solution. There was a short business session, after which the delegate, Mrs. Hoskins, gave a brief report of the convention held in Wetaskiwin in June. A paper on "The care of the cream separator," and the fifth chapter of the continued story brought the meeting to a close. A social hour, including card reading, was then spent. The August meeting will be held at the home of Mrs. T. H. Hovos, when the Millet Local will be the guests of Hillside.

PUT TROUT IN MOUNTAIN LAKE

Jasper, Alta., July 13.—After a journey of at least two thousand miles the largest group of United States immigrants that ever settled in Canada has established its home in Jasper National Park.

During the week-end 200,000 Brook Trout fingerlings, all the way from Cresco Pennsylvania, were placed in the waters of Maligne Lake. They came to Canada last winter as eggs and for months they have been carefully nursed in a hatchery especially constructed here for them. Herbert Davis, one of the park wardens, whose charge they were, watched them grow from eggs to fish, kept the cold water running at the proper temperature, and when they were big enough to eat fed them chopped liver. They were brought from Pennsylvania to Jasper by Canadian National express, and were transferred to Maligne Lake by pack horse, wagon and automobile. There was no difficulty, in these last 35 miles to keep the tins in which they floated constantly moving, and they made the journey without mishap. The water of the lake was tested before they were lowered into it, and before they were lowered into it, and they showed themselves acclimatized immediately. Oliver Bright of the Dominion Hatchery at Fort Qu'Appelle, superintended operations and Warden Davis kept watch over his pets until he saw them safe in their new home. The stocking of Maligne Lake with trout is one of the experiments being made here in glacial waters by the Dominion Government.

SQUEAK! SQUEAK..

Wags: Sorry to keep you waiting, old man, but I've just been setting a trap for my wife.

Wigs: Heavens! What do you suspect?

Wags: A mouse in the pantry.

The best way to get things coming your way is to get busy and go after them.

Rheumatism

Minard's is the enemy of all rheumatic troubles. Rub it in thoroughly and often.

It eases the pain, supplies the joints, puts new life into the tissues.

Rub it in

Declares War

"Fruit-a-lives"—the Enemy of Dyspepsia

ST. URSALE, QUE.—"For ten years I could not digest food. Now I eat like a new man. Fruit-a-lives relieved me completely."

—Jos. Martin.

Our way of living lays most of us open to recurrent attacks of dyspepsia and kindred ailments. To remedy this, the regular use of Fruit-a-lives is highly recommended.

The gentle, natural stimulation of the bowels and digestive system by the fruit juice extracts and tonic in Fruit-a-lives soon heals bothersome and painful digestion. Try it. Sold by all druggists—25c and 50c per box.

CARE OF THE CHICKS ON RANGE

(Experimental Farms Note)

The simpler the methods of feeding and caring for the chicks that can be adopted the better.

Feeding tests at the Central Experimental Farm have shown equally good results from hopper feeding as when the chicks were fed at regular intervals, five or six times a day. When the nursery period is past and the chicks are old enough to go without heat they should be given roosts and as soon as they become used to them should be put out on range.

For range a light sandy soil is best. If a field of alfalfa is available on the one hand and a corn field on the other the conditions are ideal.

Do not overcrowd; use airy, well-ventilated houses, a mere shelter—no roof with walls covered with netting we have found excellent.

Shift the houses and feed hoppers frequently so that the ground where the chicks spend most of their time does not become contaminated.

Keep a supply of pure water, hopper of growing mash, crimped oats, grit and oyster shell before the flock at all times. Give a full feed of grain in the evening; this is fed either by hand or kept in hoppers which can be opened for a while in the evening and closed through the day.

Chickens kept as described will be reared under ideal conditions with the minimum amount of labor.

An old man who was called into the witness-box happened to be rather shortsighted and went up the stairs which led to the bench instead of those that led to the box.

The magistrate, a man with a remarkable sense of humor, smiled. "Do you want to be a magistrate like me, then?" he asked good naturedly.

"To be sure, your honor," came the jovial answer. "I'm an old man now an' maybe it's all I'm good for."

Little Edith: "I'm going to marry a Dutchman when I grow up." Mother: "But why a Dutchman?" Little Edith: "Oh, I so want to be a duchess."

***You will see Hoot Gibson at his ridin', ropin', lovin' best in "A Trick of Hearts," at the Angus Theatre on Wednesday only, July 18th.

GRIM TRAGEDY ON
MANVILLE FARM UNSOLVED

On Wednesday morning the A.P.P. were still without any definite clues which might lead to the solution of the Manville tragedy in which four people on the Booher farm were shot to death at about 7:30 p.m. on Monday. Vernon Booher, 20 years old, who found his mother, brother, and two hired men lying dead around the house and barn, shot through the heads, when he returned from the pasture at the sound of shooting, is being held as a material witness.

Although a .303 rifle shell was found on the floor of the kitchen, in which Fred Booher was shot, no gun has been found on the farm. The generally accepted theory of the murder in the Manville district is that the slaying was the work of a madman. However, no stranger has been seen around the neighborhood, so far as can be ascertained at present.

LONE RIDGE

On account of the wet weather last week, there was only a small attendance at the regular meeting of the U.F.A., so it was decided to hold the next meeting on Friday evening, July 13th, at eight o'clock. At this meeting the delegates to the political convention and also the young people's conference in Edmonton will give their reports.

FALUN

The twentieth anniversary of the wedding of Mr. and Mrs. W. Milton of the Falun district, was celebrated on Sunday of last week when a large number of neighbors and friends assembled to do them honor. The bride and groom were taken by surprise but they royally welcomed all the guests, and a very enjoyable time was spent. Mr. and Mrs. Milton were made the recipients of several nice pieces of silverware, and a bounteous luncheon was served. Mr. and Mrs. Milton are held in the highest esteem in the district, and it is the wish of their host of friends that they be spared to enjoy many more wedding anniversaries.

A surprise party was held at the Ernest Park school house on Thursday evening when the parents and children assembled to honor the teacher, Mr. B. Pruhans, who had just completed a successful term. Dancing was indulged in, a sumptuous supper was served, and all report having had a delightful evening.

W. C. T. U.

A year's temperance teaching authorized by the Federated Prohibition Association of Canada, was introduced at a meeting called for that purpose by Mr. Hull, secretary of the Prohibition Association, held at the home of Mrs. Mellett, June 13. The churches were fairly well represented and the proposition enthusiastically taken up by those present. One of the city pastors expressed the thought that the success of the work rested with the teachers. The course consists of twelve lessons illustrated by charts. The objective is an initiative uniform system of scientific temperance education for Canada by the teaching of monthly lessons; where practical in Sunday schools, public and high schools and in the different organizations of children and youth from coast to coast. was written and the charts designed by Miss McCordindale of Australia, a celebrated worker among young people while on a tour through Canada two years ago under the auspices of the National W.C.T.U. The book and charts are sold at cost of publication, \$1.00. At the last Provincial convention secretary Hull reported the placing of 150 sets of this book and charts on "Science and Health."

DEVOTE MONEY FROM
ELEVATOR OVERAGES
TO GRAIN RESEARCH

Ottawa, July 8.—The federal government has decided to devote the entire amount of money resulting from the overages in Canadian terminal elevators toward research in connection with grain problems. In making this announcement, Hon. James Macdonald, minister of trade and commerce, stated that the decision had been made in view of the ever-increasing number of problems respecting the production and marketing of Canadian grain.

The expenditures of monies resulting from overages will be under the direction of the National Research Council, and the order-in-council relative to the disposal of such monies along these lines has been passed. Expenditures will be utilized not

only to subsidize and extend the various researches now under way in universities and research laboratories, now conducting such work, but will make possible research on many pressing problems for which money heretofore has not been available.

In the opinion of the government, monies accruing from the grain trade should, as far as possible, go toward the solving of the problems of that trade. Among the most important problems in connection with which research has been going on for some time past, is that of combating rust. The amount of money from overages in Canadian terminal elevators at the disposal of the government for the purposes mentioned is \$219,000.

BORN

KILLELEY.—At Hillsdale, on the 9th inst., to Mr. and Mrs. Percy Killeley, a son.

DUX.—In the Wetaskiwin hospital, on the 6th inst., to Mr. and Mrs. Henry Dux, a son.

HAAK.—In Wetaskiwin, on the 10th inst., to Mr. and Mrs. Herman Haak, a daughter.

OMISSION

In our reference last week to the demise of the late Mrs. Gunner, we omitted to state that she leaves a husband, five sons and two daughters, and one daughter pre-deceased her. She also leaves twenty-five grand children.
